

To your benefit. Worldwide.

Certification of Quality assurance in transport and storage logistic for wood pellets.

In addition to high product quality in wood pellet manufacturing, the integrity of the entire logistics chain from manufacturer to end-consumer must be maintained. For pellet quality that makes it.

The mark that shows the difference.

In pellet manufacture, product quality is extremely important. Even the best wood pellets can suffer considerably from the wrong kind of transportation from the manufacturing plant to the customer. Too much fine material, for example, can lead to operational failures in the pellet boiler. With the certification process and the “DINplus” Quality mark, DIN CERTCO considers this fact.

Show your customers that pellet quality is maintained throughout the entire logistic chain, as this is, ultimately, the decisive advantage of your product. Display the mark for product quality. For quality that makes it to the customer.

By using the “DINplus” mark, you document the fact that you work to the highest quality standards, offer consistently high product quality and undergo regular monitoring.

Manufacturers, merchants and transport companies demonstrate with this mark that pellet quality is guaranteed throughout the entire logistics chain.

Inspection and monitoring.

The trader/transport company must prove that they have traceability about the supplied pellet quality. Along with the separation of certified, uncertified pellets and other materials during transport and storage, defined requirements must be fulfilled in interim storage and the transport vehicles. With regard to the suitability of staff, appropriate implementation and consultation of the customer when stocking the storage area are considered. The specialist company carries out its own trainings, which are monitored regular by DIN CERTCO.

Assessment and certification.

After successful assessment by DIN CERTCO a certificate and the right to use the respective “DINplus” quality mark together with an individual registration number for a fixed period of time specified in the certification scheme is awarded.

Openness and transparency.

An up-to-date list of all holders of a DIN CERTCO certificate can be viewed on the DIN CERTCO website. All the documentation relating to certification, such as the certification scheme and application form can also be accessed here.

There are many good reasons for obtaining DIN certification.

- Market confidence and the confidence of people in the internationally-renowned “DINplus” mark
- Confirmation of your quality statement by DIN CERTCO, as an independent, accredited certification body
- A guide and aid to decision making for your customers in a confusing market
- Clearly set yourself apart in the competitive environment and tap into new domestic and international markets
