

## Leaflet

### For identification of the packing, the labels and the accompanying papers for wood briquettes according to DIN EN ISO 17225-3

The packaging must be indicated with the following information durable and in the German language or in the official language of the country, where the transport of the product is provided clearly and well readable:

1. Name or registered trademark of the manufacturer or the supplier/distributor
2. Designation of product with inscription of the diameter, width and length (in mm) and shape, e. g. wood briquettes – diameter 80 mm, length 300 mm, shape 2
3. Nominal weight
4. The combustion may be carried out in approved and licensed fireplaces only (see operating instructions of the fireplace). Please, pay attention that this notice must be written literally.
5. Advice for the proper storage and combustion of wood briquettes. You could write e.g.: store the wood briquettes dry and airy please. Fill your stove according to its construction only. The compacted swarf expands when heating. We recommend splitting of the wood briquettes 2 until 3 times. You should never overfeed the furnace. Please fill the combustion chamber of the furnace not more than half. Do not lock the furnace before the complete burning good is died down. Provide out-reaching change of air. Not ignite the fire with highly flammable liquids such as alcohol, spirit or petrol.
6. The reference in terms of the environment protection: “The packing may not be burned with.“
7. Production year (it has always to be updated)
8. The quality mark “DINplus” with the corresponding registration number.
9. If more than one production plant a clear differentiator must be created, e.g. number, letter or any else can be selected. (The marking has to be announced to DIN CERTCO in written form.)
10. Inscription of the standard: **DIN EN ISO 17225-3** (optional)
