

Leaflet

for identification of the packing / the inlaid paper / accompanying papers for wood pellets according to DIN EN ISO 17225-2 (A1) for use in small furnaces

The packaging and/or the accompanying papers (with unpacked consignments) must be indicated by the following data durably and in German language well readably:

- 1) Name or registered trademark of the manufacturer or the supplier/distributor
- 2) Designation of the product with indication of the diameter (in mm) e. g. wood pellets – diameter 6 mm
- 3) Nominal weight and/or mass of the packaging content
- 4) Ash melting temperature (optional)
- 5) Notice, that during transport and storage the pellets are to be protected from moisture.
- 6) The pellets must only be combusted in heat-producing appliances that are suitable and permissible for this type of fuel (cf. operating instructions for the heat-producing appliance).
- 7) For clear identification of the delivery, every product or its packaging/insert/accompanying documents must be labelled with the year of manufacture and, in the case of several monitored production sites, the production site. This can take the form of an identification code and/or a serial number providing information on the year of manufacture and the production site (the encoding must be declared to DIN CERTCO). For reasons of the traceability the marking with the actual date is recommended.
- 8) Quality mark “DIN*plus*” (The mark may only be used in his original form. The mark may only be modified proportionally in terms of its size. Deviating from the colour design in the template, marks may be depicted in mono colouring.) and with corresponding registration number (following successful certification, see also clause 5.4 of the currently valid certification scheme for wood pellets).
