DIN CERTCO

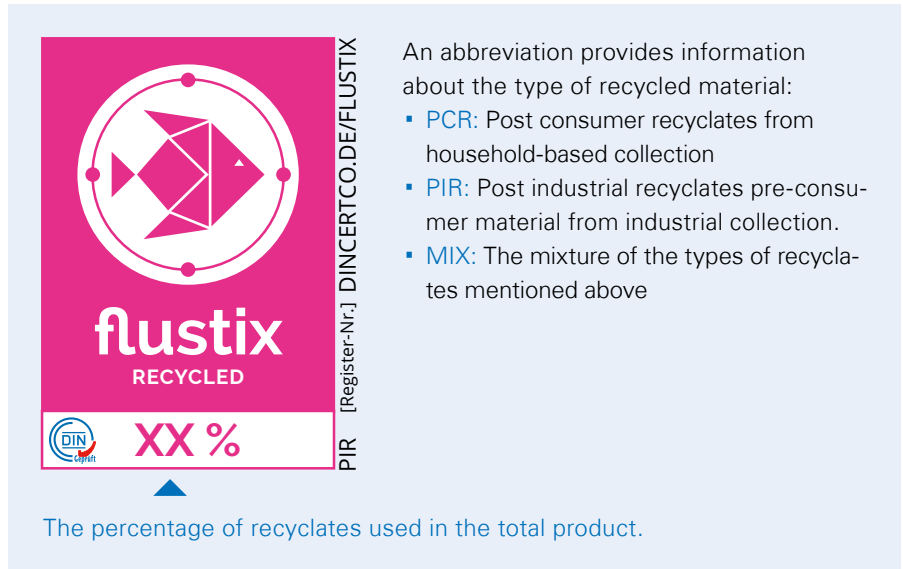

**THE FLUSTIX RECYCLED –
DIN-GEPRÜFT TRUSTMARKT**

All products and packaging partly or fully made from plastic recyclates are eligible for the flustix RECYCLED – DIN-Geprüft certification. Regranulates and semifinished products can be certified, too (B2B).

THE CERTIFICATION IS BASED ON:

- DIN EN ISO 14021 Declaration of recycled content
- DIN EN 15343 Plastic recycling traceability

The certification scheme can be found on: www.dincertco.de/en/flustix

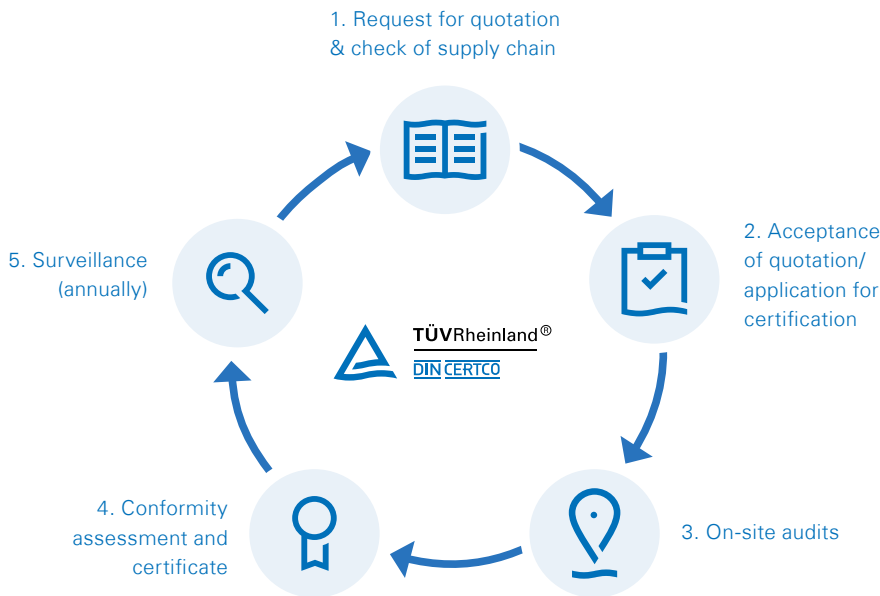

An abbreviation provides information about the type of recycled material:

- **PCR:** Post consumer recyclates from household-based collection
- **PIR:** Post industrial recyclates pre-consumer material from industrial collection.
- **MIX:** The mixture of the types of recyclates mentioned above

The percentage of recyclates used in the total product.

How to get certified?

BENEFITS OF CERTIFICATION:

- Tax advantages for packaging manufacturers across the EU
- Protection against green washing and wrong claiming allegations by NGOs as well as competition
- Support within the framework of the European Green Deal
- Customers focus on environmentally friendly products and packaging
- flustix RECYCLED – DIN-Geprüft is listed at Siegelklarheit.de, recommended by the German Ministry of Environment and listed as “good practice” by the EU
